🌟 Professional Summary

Technology Solutions Consultant and IT Professional with experience in software requirements analysis, quality assurance (QA), web development, and technical support. Skilled in helping businesses transform complex technology needs into practical, efficient digital solutions.

Experienced in manual software testing, requirements gathering, website development, and deployment, with a strong focus on quality, usability, and continuous improvement. Proficient in leveraging AI-powered tools to accelerate software development, documentation, content creation, and problem-solving while maintaining high standards of quality and accuracy.

Currently expanding my expertise through advanced training in mobile application development for both Android and iOS, while continuing to strengthen my knowledge in software testing and automation.
